

CLAIMS

- [1] A laminated film, characterized in that it comprises a resin sheet having a cured resin layer containing glass cloth and a polarizing plate laminated on the resin sheet, in which any one of weft yarn and warp yarn of the glass cloth is oriented at an angle of 5 degrees or less relative to an absorption axis of the polarizing plate.
- [2] A laminated film according to claim 1, wherein the glass cloth is embedded in a cured resin material that forms the cured resin layer.
- [3] A laminated film according to any one of claims 1 and 2, wherein the resin sheet includes a hard-coat layer that is harder than the cured resin layer.
- [4] A laminated film according to any one of claims 1 to 3, wherein the resin sheet includes a gas barrier layer that has higher gas barrier property than the cured resin layer.
- [5] A liquid crystal cell display device comprising the laminated film according to any one of claims 1 to 4.
- [6] An image display device comprising the laminated film according to any one of claims 1 to 4.
